Automobiles: Next opportunity sector for textiles

发布日期：2009-09-25

At Expo Hightex on October 7, 2009, in Montréal, Mr. Serge Carignan, Study Director at the Association du transport urbain du Québec (ATUQ), will present a report on the evolution of transportation vehicles in Québec, specifically on the standards that components manufacturers must meet. Mr. Carignan sits on the ATUQ's technical committee and is an active participant in writing these standards.

Vehicle construction represents a valuable and highly promising segment for the Canadian textile industry; Carignan's lecture is therefore a not-to-be-missed opportunity to learn more about the opportunities that will be available at the next cycle of invitations to tender (2012-2016). His seminar is of great interest to manufacturers and industry observers alike.

Expo Hightex is a unique opportunity to discover this promising field, on both a technological level and a commercial one.

About Expo Hightex 2009:

Expo Hightex, 7-8 October 2009, Montreal, showcases the latest technological advances to encourage technological and commercial partnerships. A not-to-be-missed industry event, it attracts one thousand business and research leaders. Though its focus is Canadian textiles, the conferences and networking opportunities are aimed at such industries as aerospace, health, protective equipment and construction. It is organized by CTT Group, a Canadian non-profit organization dedicated to technological and commercial development
